

A METHOD AND SYSTEM FOR PRODUCING AN INTERNET PAGE
DESCRIPTION FILE ON A DIGITAL IMAGING DEVICE

ABSTRACT OF THE DISCLOSURE

5 A method and system for generating an HTML (hypertext markup language) file including images captured by a digital imaging device, the digital imaging device having a display. A script and it's predefined model are provided to the digital camera. The script is comprised of a set of software program instructions. The digital camera executes the script to display

10 interactive instructions on the display that prompt a user to perform specific operations. In response to the user performing the specific operations, the digital camera automatically updates the interactive instructions, such that the user is guided through a series of related image captures to obtain a series of resulting images. The digital camera then generates an HTML file

15 including the resulting images, wherein the HTML file is formatted in accordance with the predefined model.
